Delivering Innovative Materials and Technical Expertise

As a leading thermoplastic resin and compound distributor, Nexeo Plastics goes beyond logistics to support our customers wherever they are in their product life cycle. From concept to commercialization, our broad portfolio of commodity and specialty resins, technical expertise, and expansive distribution network are in place to support your application requirements.

We are proud to supply products that comply with stringent healthcare regulations, including:

- ISO 10993 Substance Management Lists
- USP Class VI End Use Compliance

In addition to regulatory compliance, many of these products can withstand various sterilization methods, including autoclave, gamma, e-beam and EtO. Some of these materials can also be selected to be potentially biocompatible and adhere to healthcare management change policies. Our engineers are ready to support you in your development cycle through to production of your article.

Our team of experts can help with material selection support, product design, and review regulatory needs to meet your application requirements.

Comprehensive Solutions for the Healthcare Market

- Thousands of thermoplastics materials representing the world's leading suppliers
- Technical experts to help you on every step of the material selection process
- National distribution coverage with a centralized network
