## Delivering Innovative Materials and Technical Expertise

**A**s a global leader in plastics distribution, we can connect you with an ever-growing portfolio of sustainable materials and technical solutions to help you achieve desired sustainability targets. Whether it involves reducing part weight; improving operational efficiencies in processing, or using sustainably sourced thermoplastics, we work with you to help find the ideal solution.

Our solutions included biobased, post-industrial (PIR) and post-consumer (PCR) recycled plastics, for both commodity and engineered thermoplastics resins. **We offer materials that can meet regulatory standards and guidelines, including:**

- ASTM D6400 –04 Standard Specification for Compostable Plastics
- ASTM D6866 for Biobased Content Testing

More than “green” materials, our team of experts can evaluate your entire production process to identify opportunities to contribute to a more circular economy for every market and every production process.

### Comprehensive Solutions for Sustainable Applications

- Thousands of materials from the world's leading suppliers, including recycled and biobased materials
- Technical experts to help you during the entire production process
- National distribution coverage with a centralized network
