

HEAVY-WEIGHT TECHNOLOGY

WASHINGTON PENN
An **AUDIA** Company

Formulate Great.™

LET US WEIGH IN.

At Washington Penn, we design heavy-weight technology solutions for a variety of markets and applications. Our technologies offer heavy-weight feel that add a higher perception of quality and sound dampening properties.

We can enhance sound and feel using reinforcements, giving material the weight of a glass product, while offering the durability of plastic. Our heavy-weight reinforcing additives can increase part weight up to 3 times over an unfilled polyolefins.

Ready for a customized solution? Contact us and we'll work together to formulate great.

Applications

- **Automotive (various)**
- **Cosmetic packaging**
- **Stationary pens**
- **Consumer personal products**

Key Characteristics

- **Higher perception of quality**
- **Sound dampening properties**
- **Weight of glass, yet durability of plastic**
- **Engine noise reduction**
